VMBO-T  
I've finished my economics vmbo-t study.

## About me

I'm a full stack developer from Amsterdam. I started developing at the age of 14 (in Flash). I really enjoyed doing it, so I decided to make it my "job". When I was 16 I was already working at a company as a front-end web developer. There is not really much to tell about school because I didn't really learned my craft there.

Now fast forward 9 years further, I've worked at 3 companies where I have learned a lot like the latest techniques and how to work in a team. One day I've decided to quit my job and start on my own to get some more freedom and only take on projects I really like so I can put a 110% effort in.

## Latest work

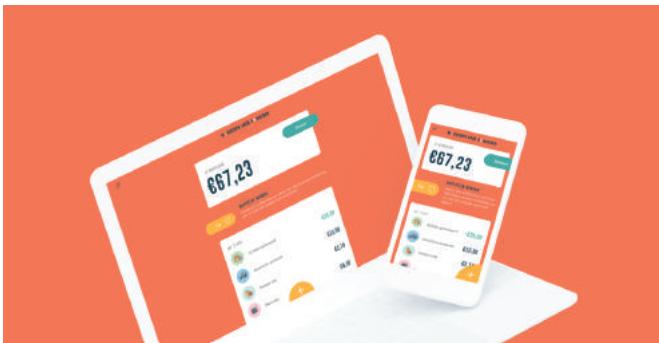

### PowerPeers - dashboard

Agency PowerPeers

Function Front-end developer

Tools ReactJS, React-native Redux, Webpack, HTML5, Sass

For the clients of PowerPeers I've buit the frontend of the dashboard in React JS.

### Minderen voor Kinderen

Agency Linda foundation

Function Front-end developer

Tools ReactJS, React-native Redux, Webpack, HTML5, Sass

This was a project for Unicef and the Linda foundation. To donate money by safing money on a daily bases. I've build the app and website together with an intern of mine. It was presented at DWD and RTL Late night.

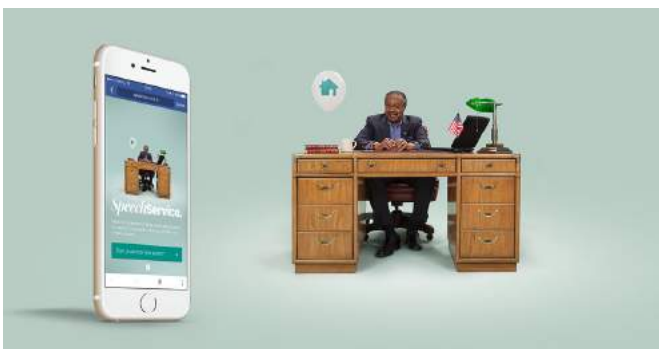

### Locali

Agency The broadcaster

Function Front-end developer

Tools ReactJS, Webpack, HTML5, Sass, Laravel 5.4, phonegap

This app was build with 2 back-end developers who did most of the laravel api. I've made the whole front-end in React JS that could be packaged with phonegap to make it available in the app stores.

### ABN Amro - Speech Writer

Agency N = 5

Function Full stack developer

Tools ReactJS, HTML5, Sass, Laravel 5.2, Webpack

For ABN Amro I've build a small app that could generate a speech for you based on some questions you needed to fill in. Within the questions there was a interactive video wich made it pretty challenging.
